

Math Facts Made Fun!

This workshop is for children entering second and third grades in the Fall and still struggling with the basic addition and subtraction facts!

Blast through addition and subtraction facts with fun, stress-free games and strategies!

The focus will be on whole-part thinking and using the understanding of 5 and 10 to make the facts easy to figure out with speed and confidence!

Each week will include:

Light homework and “make and take” games in addition to activities which support recognizing patterns, part-whole thinking, and fun strategies for figuring out addition and subtraction with larger numbers!

*We will meet on Tuesdays and Thursdays,
from 3:30-4:30 for 2 weeks.*

June 21, 23, 28, & 30.

The cost is \$150.

(Limited to 5 participants.)

*If you are interested in this workshop for your child, please contact
